

I am currently attending a public meeting concerning the FCC's proposal to deregulate many aspects of the media. Although I am not completely informed of all of the issues, I am concerned with the rapid pace that the FCC is taking on this issue. I feel that such important decisions should be debated and shared with the community. Tampering with the freedoms of this country should not be taken lightly and secretively. I ask of you to not vote on this issue until a reasonable discourse, that includes the voice of the people, has taken place.

Thank You,
Robert Pyle
